TO BME GROWTH

Barcelona, June 20, 2024

In accordance with the provisions of article 227 of the consolidated text of the Law on Market Securities and Investment Services, approved by Royal Legislative Decree 6/2023, of 17 March, and its concordant provisions, as well as Circular 3/2020 of the BME Growth segment of BME MTF Equity, Holaluz-Clidom, S.A. ("Holaluz" or the "Company") hereby informs you of the following information:

OTHER RELEVANT INFORMATION

Holaluz, the green energy technology company with the objective is to decarbonize the economy, expects its solar division to reach break even - the profitability threshold - by the end of the year, thanks to the transformation measures implemented by the company, which confirm the path of operational efficiency, and to the increased penetration of batteries in the solar installations of its customers, which has emerged as a clear vector of profitability for the group.

In this line, Holaluz has been able to double the penetration of batteries from 15% in the first quarter of this year to 30% in May as a result of the "Tarifa Justa" product, which allows customers who incorporate a battery in their photovoltaic installations not to pay the electricity bill for five years. The product offers customers the installation of panels and batteries with the aim of making the most of the energy produced by their roof during the day, which can be stored to be used and shared at night.
